

Merchant Cash Advance

Flexible business funding from
£3,000 to £500,000

For businesses trading 9 months +

As champions of small business, we understand that cash is king for growing businesses. That's why our new funding solution takes the hassle out of raising extra cash flow. Our Merchant Cash Advance is fast, simple, and best of all, it's flexible: **your client only pays us back when they get paid.**

Benefits for your client

Fast

Instant quote, approval in 24hrs, and funding in a few days.

Hassle-free

Minimal paperwork and easy set up. No need to change the card terminal provider.

Flexible

Your client only pays when they get paid. No fixed terms or repayment deadlines.

Benefits for you

Expand your portfolio

Better service your client's funding needs.

Win new business

With a specialist product for key industries such as hospitality and retail.

Attractive commissions

Up to 15% plus extra commission each time your client renews.

Repay as they earn

The amount your client pays back is an affordable percentage of their daily card takings. They repay at the pace their business grows. Repayments are deducted automatically via their card terminal.

Perfect for many business types

Our flexible funding solution is the perfect fit for seasonal businesses or any business which has ebbs and flows in income.

Hospitality, Retail, Beauty, MOT Centres and more...

CAPITAL**

FAQs

1. How does a Merchant Cash Advance differ from a business loan?

Your client only repays when they get paid. There are no fixed repayments or repayment term: A Merchant Cash Advance works by taking a small percentage of your daily card takings until it is repaid in full.

2. What are the criteria?

Your client must have been trading a minimum of 9 months, and have a minimum monthly turnover of £6,000. At least £3,000 a month must be in card sales through a card terminal.

3. How much could my client get?

We provide Merchant Cash Advances from £3,000 to £500,000. How much your client could get will depend on their monthly turnover and card sales.

4. How long does it take?

Our Merchant Cash Advance is another fast funding solution from Boost Capital. The whole process through to funding typically takes just a few days (but this may depend on the card acquirer).

5. How do repayments work?

Our Merchant Cash Advance is designed to be flexible and affordable for your client. They only repay when they get paid, and there's no fixed term.

Repayments are easy and hassle-free. They work by taking a small percentage of their card revenue. When things are going well, your client will pay back more. But if the business is having a leaner period, they'll pay back a smaller amount.

Repayments are collected automatically via their card terminal – so there's no more worrying about remembering to make repayments.

6. Will my client need to switch their card terminal provider?

No - our flexible funding solutions are designed to work around their business. We will work around their current arrangement and keep paperwork and set-up to a minimum.

7. How does Boost Capital's Merchant Cash Advance differ from other providers?

Our Merchant Cash Advance is the most flexible on the market. How much we can lend is based on the total business turnover (and not just card revenue) – so there's a higher chance of being approved for a larger amount. We work with all of the major card terminal providers, and with very little paperwork, our process is also one of the fastest and simplest. Finally, if a Merchant Cash Advance isn't suitable for your client, we may still be able to offer our loan product - with no additional paperwork.
